NIGRAH

UI/UX DESIGN SPECIFICATION — V1

Product: NIGRAH — Multimodal Financial Threat Intelligence
Primary audience: Tier-2 / Tier-3 Indian investors, first-time and emerging digital investors
Secondary audience: Educated investors, researchers, financial educators, journalists, analysts, institutions
Core experience: SCAN → SCORE → EXPLAIN → VERIFY → ACT SAFELY

---

01 — DESIGN PSYCHOLOGY

Core emotional journey

CALM → TRUST → CLARITY → CONTROL

NIGRAH must feel

- Calm
- Intelligent
- Protective
- Transparent
- Serious
- Simple
- Modern
- Dependable
- Human

NIGRAH must NOT feel

- Cyberpunk
- Gaming
- Crypto-speculative
- Alarmist
- Government-portal-like
- Complicated
- Aggressive

- Overly technical

Core UX principles

1. **One primary action per screen**
2. **Simple first → detail on demand**
3. **Evidence before assertion**
4. **Explain before recommending**
5. **Threat severity ≠ confidence**
6. **Verification ≠ guarantee of safety**
7. **Technical intelligence remains underneath simple UX**
8. **Mobile-first**
9. **Low-friction interaction**
10. **Minimal cognitive load**
11. **Progressive disclosure**
12. **Smooth transitions**
13. **No unnecessary animation**
14. **No excessive red**
15. **No unnecessary dashboards**
16. **No forced financial terminology**
17. **User remains in control**

---

02 — COLOR SYSTEM

Primary Color — Trust Blue

HEX: `#2F80ED`

Meaning

- Trust
- Reliability
- Verification
- Action
- Stability

Use

- Primary CTA
- Active navigation
- Links
- Verification actions
- Selected states
- Important interactive elements
- Progress indicators
- Primary buttons
- Focus states

Primary CTA

Blue background + white text

---

03 — SECONDARY COLOR — INTELLIGENCE INDIGO

HEX: `#635BFF`

Meaning

- AI
- Intelligence
- Analysis
- Discovery
- Computational processing

Use

- AI analysis
- Multimodal processing
- Intelligence graph
- Advanced analytics
- Emerging-threat intelligence
- Processing animation
- Advanced mode

Rule

Indigo represents:

NIGRAH is thinking.

Blue represents:

NIGRAH is helping / verifying / acting.

---

04 — BASE COLOR — DEEP INK NAVY

HEX: `#07111F`

Meaning

- Calm
- Seriousness
- Concentration
- Security
- Depth

Use

- Main background
- Header
- Navigation
- Landing page
- Analysis screen
- Dashboard
- Intelligence environment

---

05 — SURFACE COLORS

Surface 01

`#0C1726`

Use for:

- Cards
- Input containers

- Panels

Surface 02

`#111F31`

Use for:

- Elevated cards
- Expanded sections
- Modal content

Border

`#203047`

Use for:

- Card boundaries
- Input fields
- Dividers
- Navigation separators

Borders must remain subtle.

---

06 — WHITE / OFF-WHITE

HEX: `#F5F7FA`

Meaning

- Clarity
- Readability
- Confidence
- Information

Use

- Primary text
- Important numbers
- Headings

- Results
- Evidence
- Main content

Secondary text

`#AAB7C7`

Tertiary text

`#718096`

---

07 — GREEN — VERIFIED

HEX: `#27AE60`

Meaning

VERIFIED

Not:

SAFE INVESTMENT

Use

- Verified registration
- Official-source match
- Confirmed information
- Successful verification
- Positive system confirmation

Example

✓ **Registration found**

---

08 — AMBER — CAUTION

HEX: #F2A93B

Meaning

CAUTION / UNCERTAINTY

Use

- Medium risk
- Incomplete evidence
- Unusual patterns
- Verification required
- Elevated concern

Example

62 / 100 — Elevated Risk

---

09 — RED — ACTIONABLE DANGER

HEX: #EB5757

Meaning

CRITICAL RISK / IMMEDIATE CAUTION

Use

Only for:

- Critical risk
- High-risk signals
- “Do not transfer money yet”
- Critical warnings
- High-risk score indicators

Rule

Red must be scarce.

No red backgrounds across the entire interface.

No red decorative elements.

No red navigation.

11 — TYPOGRAPHY

Primary font

Inter

Alternative:

Manrope

No futuristic display fonts.

Typography hierarchy

Hero heading

Desktop:

56–64 px

Mobile:

32–40 px

Weight:

600–700

Page heading

32–40 px

Weight:

600–700

Section heading

20–24 px

Weight:

600

Result score

72–96 px

Weight:

600–700

Primary body

16–18 px

Line height:

1.5

Secondary body

14–15 px

Metadata

12–13 px

Typography rules

- Short sentences
- High readability
- Large numbers
- High contrast
- Avoid dense paragraphs
- Avoid excessive uppercase
- Use uppercase only for labels/statuses
- Use sentence case for user-facing explanations

---

12 — UI SHAPE SYSTEM

Border radius

Large containers

16 px

Cards

12–16 px

Buttons

10–12 px

Inputs

10–12 px

Pills

999 px

Borders

1 px.

Low contrast.

No heavy outlines.

Shadows

Very subtle.

Prefer:

- depth through surface contrast
- border contrast
- soft gradients

Avoid heavy drop shadows.

---

13 — MOTION SYSTEM

General movement

Glide → settle

Never:

bounce → shake → pop

Micro-interaction

150–200 ms

Component transition

250–350 ms

Major transition

400–600 ms

Animation rules

- Fade + slight translation
- No excessive parallax
- No bouncing cards
- No flashing warnings
- No unnecessary loading spinners
- No dramatic screen shake
- No gamification
- No confetti

---

14 — LANDING PAGE

Header

Left:

NIGRAH

Center/right navigation:

- Product
- How it works
- Intelligence
- Verify

Right:

Check Something →

Hero eyebrow

FINANCIAL THREAT INTELLIGENCE

Hero headline

Something suspicious?

Check it before you pay.

Supporting text

Upload a message, screenshot, audio, video, PDF or website. NIGRAH will explain what looks suspicious and help you verify it.

Primary CTA

Check Something →

Blue button.

White text.

Secondary CTA

See an example

Text/button style.

Hero visual

Display a realistic suspicious message:

Telegram

Guaranteed 15% weekly returns.

SEBI certified analyst.

Only 5 seats left.

[JOIN VIP GROUP]

Subtle NIGRAH intelligence layer around it.

No giant robot.

No generic AI brain.

No excessive neon.

Trust footer

Public-good initiative • Privacy by design

Institutional references positioned discretely.

---

15 — FIRST ACTION

User clicks:

Check Something

Transition:

250–350 ms

Landing content moves upward.

Input screen fades/slides in.

---

16 — INPUT SCREEN

Heading

What do you want to check?

Six input options

MESSAGE
SCREENSHOT
WEBSITE

AUDIO
VIDEO
PDF

Each represented by:

- simple icon
- short label
- clear boundary

Universal input

Why did NIGRAH flag this?

Subheading:

4 important signals found

Signal cards

01

Guaranteed return

Evidence:

“15% weekly returns”

Signal:

High risk

02

Fake authority

Evidence:

“SEBI certified analyst”

Signal:

High risk

03

Urgency

Evidence:

“Only 5 seats left”

Signal:

High risk

04

Payment request

Evidence:

“Pay to join VIP group”

Signal:

High risk

---

24 — DETAILED ANALYSIS

Button:

See Detailed Analysis →

Detailed sections

- Threat signals

- Manipulation patterns
- Scam family
- Similarity
- Threat Index
- Confidence
- Evidence
- Sources
- Regional context
- Platform context

---

25 — THREAT INDEX

Main

91 / 100

CRITICAL RISK

Components

Signal Pattern HIGH

Family Harm HIGH

Growth MEDIUM

Regional Impact HIGH

Confidence 89%

Expandable

How is this calculated?

Show detailed scoring framework:

TI = 0.30 SPS + 0.25 FHS + 0.15 GRS + 0.15 RIS + 0.15 CS

Where:

- SPS = Signal Pattern
- FHS = Family Harm
- GRS = Growth
- RIS = Regional Impact
- CS = Confidence

---

26 — MULTIMODAL ANALYSIS

For multiple input modalities:

↓

Before you act

No desktop-style dense dashboard.

---

43 — LANGUAGE

Primary:

English

Language switch:

हिन्दी

Future-ready:

- Bhojpuri
- Tamil
- Other Indian languages

Simple-language mode

Avoid unnecessarily technical terminology.

Use:

“Why was this flagged?”

instead of:

“Threat-vector explanation.”

Use:

“How confident are we?”

instead of:

“Evidence-weighted confidence metric.”

Use:

“Check the person/company”

instead of:

“Entity verification.”

---

44 — PRIVACY UI

During upload:

Your scan stays yours.

Supporting text:

No bank account, OTP or private-message access required.

---

45 — TRUST UI

Use institutional references as trust anchors.

Do not make the interface look like an official SEBI product.

Placement:

- Footer
- About
- Sources
- Verification
- Trust section

Primary product identity remains:

NIGRAH

---

46 — ERROR STATES

Failed scan

We couldn't complete the scan.

Try uploading the file again or provide another source.

CTA:

Try Again

Unsupported file

We can't read this file yet.

Try a screenshot, PDF, audio, video or website instead.

Insufficient evidence

Not enough evidence yet.

NIGRAH could not confidently assess this content.

CTA:

Add More Evidence

---

47 — UNCERTAINTY STATES

Never display:

SAFE

unless the product has an explicit, evidence-supported verification state.

Prefer:

Low concern

No significant risk signals detected

Verification recommended

---

48 — NOTIFICATION DESIGN

Avoid:

🚨 SCAM ALERT!!!

Use:

New high-risk pattern detected

or:

A scan you checked requires verification

Tone:

Calm + precise.

---

49 — ACCESSIBILITY

- WCAG-conscious contrast
- Never rely on color alone
- Risk status must include text
- Icons + labels
- Large touch targets
- Readable typography
- Keyboard navigation
- Screen-reader labels
- Reduced-motion mode

Example:

Not:

🔴

Only.

Use:

🔴 **CRITICAL RISK**

---

50 — RESPONSIVE BREAKPOINTS

Mobile

320–767 px

Primary experience.

Tablet

768–1023 px

Desktop

1024–1439 px

Large desktop

1440 px+

Desktop can expose more intelligence.

Mobile must remain simple.

---

51 — CORE COMPONENT LIBRARY

Build reusable components:

- NIGRAH Header
- Primary Button
- Secondary Button
- Scan Input
- Modality Card
- Upload Card
- URL Input
- Analysis Pipeline
- Threat Score
- Confidence Indicator
- Risk Badge
- Signal Card
- Evidence Card
- Scam Family Card
- Verification Card
- Source Card
- Knowledge Graph
- Emerging Threat Card
- History Card
- Action Panel
- Bottom Navigation
- Toast
- Modal
- Tooltip
- Expandable Intelligence Panel

---

52 — BUTTON SYSTEM

Primary

Blue background.

White text.

Example:

Check Something →

Secondary

Transparent / dark surface.

Blue border or text.

Example:

View Evidence

Destructive / caution

Red only where necessary.

Example:

Don't Transfer Money

Verified

Green.

Example:

✓ **Verified**

---

53 — CARD SYSTEM

Cards should communicate hierarchy.

Level 1

Primary action / result.

Level 2

Supporting information.

Level 3

Technical intelligence.

Cards should not all have equal visual weight.

---

54 — HOMEPAGE INFORMATION HIERARCHY

57 — NIGRAH DESIGN DNA

CALM

Deep Navy.

TRUSTED

Blue.

INTELLIGENT

Indigo.

CLEAR

Off-white.

CAUTION

Amber.

DANGER

Red.

VERIFIED

Green.

SIMPLE

One action.

DEEP

Progressive disclosure.

FUTURISTIC

Motion + intelligence visualization.

HUMAN

Simple language.

INDIA-FIRST

Mobile + multilingual + low-friction.

EVIDENCE-FIRST

Every major result connected to supporting evidence.

---

58 — FINAL DESIGN RULE

NIGRAH

Complex intelligence underneath.

Simple understanding on top.

Scan anything suspicious.

Understand why.

Verify before money moves.

Then decide.
