NIGRAH Analyze Scam Risk Engine (ASRE)

User Journey

User sees something suspicious:

- WhatsApp message
- Telegram message
- Screenshot
- Audio call recording
- YouTube investment video
- Instagram reel
- PDF brochure
- Website screenshot

Instead of asking friends:

```
"Ye genuine hai kya?"
```

They upload it to NIGRAH.

Inputs Supported

1. Text Input

Examples:

- WhatsApp messages
- Telegram messages
- Emails
- Investment offers

Example:

```
Join our VIP trading group.

Guaranteed 15% weekly returns.

Only 20 seats left.

SEBI certified analyst.
```

2. Screenshot Upload

Examples:

- WhatsApp screenshot
- Telegram screenshot
- Trading app screenshot
- Profit screenshot

3. Audio Upload

Examples:

- Investment call recording
- Voice note

User uploads:

```
audio.mp3
```

Pipeline:

```
Audio
↓
Speech-to-Text
↓
Threat Signal Extraction
↓
Threat Index
```

4. Video Upload

Examples:

- YouTube video
- Instagram reel
- Promotional investment pitch

Pipeline:

```
Video
↓
Audio Extraction
↓
Speech-to-Text
↓
Threat Signals
↓
```

```
Risk Analysis
```

5. Website URL

Example:

```
www.fastwealthindia.com
```

Pipeline:

```
Website Text
↓
Threat Signals
↓
Threat Index
```

What Happens Internally

Stage 1

Content Extraction

Text input:

```
Direct
```

Screenshot:

```
OCR
```

Audio:

```
Whisper
```

Video:

```
Audio Extraction
+
```

```
Whisper
```

Website:

```
Web Scraper
```

Stage 2

Threat Signal Detection

Example:

Content says:

```
Guaranteed Returns

Limited Seats

Join Today

SEBI Approved
```

Detected:

Signal	Score
Guaranteed Return	10
Urgency	8
Scarcity	8
Fake Authority	9

Stage 3

Pattern Mapping

Results:

```
Greed Engineering
High

Pressure Engineering
```

```
High

Authority Exploitation
High
```

Stage 4

Scam Family Matching

Similarity Engine

Results:

Family	Similarity
Telegram Signal Fraud	91%
Fake Advisor Fraud	88%
Ponzi Variant	54%

Stage 5

Threat Index

Formula:

```
Signals
+
Patterns
+
Family Harm
+
Confidence
```

Output:

```
Threat Index

91/100
```

Stage 6

Explainable Intelligence

This is important.

Do NOT show:

```
Scam Detected
```

Instead show:

```
Critical Risk

Reasons:

• Guaranteed Return Claim
• Artificial Urgency
• Authority-Based Persuasion
• Similarity to Telegram Signal Fraud
```

This makes judges trust the output.

Output Screen

Scam Risk Analysis

Threat Index

```
91 / 100
```

CRITICAL RISK

Predicted Scam Family

```
Telegram Signal Fraud
```

Similarity Score

91%

Manipulation Patterns

Greed Engineering

Authority Exploitation

Pressure Engineering

Detected Threat Signals

Guaranteed Return

Urgency

Scarcity

Fake Authority

Confidence

89%

Recommended Action

Verify registration.

Avoid fund transfer.

Cross-check advisor credentials.

Proceed with caution.

Why This Makes NIGRAH Strong

Without this feature:

```
Dashboard
+
Charts
+
Scoring
```

Looks like a research project.

With this feature:

```
Real-world Input
↓
AI Analysis
↓
Threat Intelligence
↓
Actionable Output
```

Looks like a product.

What I Would Show in the Final Demo

The judge uploads:

Screenshot

A fake Telegram investment promotion.

NIGRAH instantly displays:

```
Threat Index: 93

Family:
Telegram Signal Fraud

Patterns:
Greed
Authority
Pressure
```

```
Detected Signals:
Guaranteed Returns
Urgency
Scarcity

Confidence:
91%
```

Then you switch to:

Intelligence Dashboard

and show:

```
This family has grown 240%
in the last 90 days.

Most active regions:
UP, Bihar, MP.
```
